Hi Elaine,

Can you add the two documents to SEMS? As well, can you add the PDF to the TRW Website to Vapor Intrusion:
<https://cumulis.epa.gov/supercpad/SiteProfiles/index.cfm?fuseaction=second.scs&id=0901181&doc=Y&colid=40417?>

Have a good 3-day weekend!
Michael

Subject: TRW Microwave Site, 825 Stewart Dr: Follow-up on the Aug 19 2021 Site Visit

Hi Kurt and Josh,

Please find attached in a letter EPA's follow up comments on the August 19, 2021 site visit of the 825 Stewart Drive building. EPA requests that NGC provide a written response to EPA's comments in the next 30-days. Please feel free to contact me anytime if you have any questions or there is anything you want to go over.

Thank you,
Michael

Hi Kurt, thanks. we'll start at 08:00 then. I'll get to the site around 07:30 to 07:45. I have a briefing I need to give from 1-2 pm, so we'll either be done by then or Matt will fill in for me.

Regarding the NDA the EPA site attorney spoke to an Apple attorney and EPA is not going to sign the Apple NDA. Apple will send a letter to EPA saying that everything we create during the Site Walk (e.g., field notes, photos) is being claimed by Apple as CBI and we will treat it as such under our CBI regulations at 40 CFR Part 2. After the visit, we will send Apple back everything we created so they can then substantiate their claim. We will want to work with the Apple representative while onsite to minimize any creation of CBI. So, for example, if it's possible to take a photo at an angle that wouldn't be claimed as CBI that is probably what we'd want to do. Let me know if you have any questions.

Thank you,
Michael

Michael – Just came to mind that although my team can start whenever, I'm not sure if Apple would have constraints as they will want to escort us. If you let me know when you want to start, I will reach out and confirm it with them.

Hi Kurt,

Do you have a start time restriction? With traffic it is better for me to have an early morning start.
Thanks, Michael

Hi Kurt,

EPA management has approved the site visit. Have a good weekend.

Michael

Hi, Michael – We will have the following people attend:

- Michael Shannon – Northrop Grumman's Corporate Manager, Environmental Remediation.
- Holly Holbrook – AECOM's Project Manager
- Myself – Northrop Grumman's Project Manager

I am expecting we will also have an escort from Apple but I have not yet been able to confirm who that will be. I'll let you know as soon as I hear back from Apple.

Hi Kurt, excluding the EPA, how many people will be on the site walk?

Thanks!

Hi Kurt,

Myself and Matt Plate will be able to visit the site on Thursday 8/19. The only caveat is that we both need final approvals for field work considering the current high COVID-19 transmission rates; however, this should not be an issue.

Thank you,
Michael

Hi, Michael – We are available on Thursday 8/19. I am still waiting for confirmation from GI Partners and Apple, but I would not expect there to be any issues with them. I will give you final confirmation on it by the end of the week, but I wanted to go ahead and let you know that 8/19 is looking the best for us. We will plan to arrive the evening before so could start as early as you would like in the AM.

Subject: Site visit: TRW Microwave Site 825 Stewart Drive building

Hi Kurt,

EPA requests a site walk and inspection visit of the TRW Microwave Site 825 Stewart Drive building. Can you arrange for EPA access to the building from the current property owner, which I believe is GI DC Sunnyvale LLC? Myself and Matt Plate with EPA request reasonable access to visit the items addressed in the attached annual inspection memo and the 2014-2015 building mitigation measures that addressed the potential for vapor intrusion into the building, which included:

- The sub-slab depressurization system that was installed underneath the site building to vent vapors to the atmosphere.
- The building's concrete slab and cracks that were sealed to prevent vapor intrusion. As well as any building concrete slab penetrations (e.g., from pipes or seams in the building).
- Past indoor air sampling locations.
- The location where contaminated soil was excavated from underneath the building.
- The spaces between the walls of the three sections of the buildings that were sealed in 2014-2015.
- The emulsified vegetable oil in-situ bioremediation system.
- The location of groundwater monitoring wells.

EPA also wants to review any post 2014-2015 building modifications or changes to the building.

Can you get back to me this week with some dates for a site visit in August? Northrup Grumman and your consultant are also invited to attend, understanding that there may be COVID-19 related restrictions in how many people can visit the building or congregate. I am available for a site visit any week, except for August 9-11 and the week of August 23-27 and Matt Plate typically has limited availability on Fridays.

Feel free to call me to go over,
Thank you,

Michael Schulman

Subject: TRW Microwave - 2020 SSD Inspection Memo

Hi, Michael – As you requested during our last discussion on TRW Microwave, attached is a technical memorandum prepared by GES that summarizes the 2020 SSD system inspection conducted at the onsite building currently leased by Apple. Please let me know if you have any questions or need any additional info.
